COMMENTS

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: the claims define a process for making a garment having waist opening and a pair of hanging legs. The process comprises providing first and second webs where each is for defining a waist edge, a leg edge, a leading chassis edge, and interior surface and an exterior surface. The webs are joined to provide a crotch seam. Portions of the webs are selectively removed at the waist portions for providing a crotch gap. The webs are drawn from each other in a cross-machine direction and a slitting is provided between the first and second web leg portions and waist portions. Wherein the slitting provides chassis edge and surface portions, which are fastened to provide a garment having a waist opening and a pair of hanging legs. The dependent claims further define steps limiting the method of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
